

**MECHANICAL
PRESSURE GAUGES**

Schrader offers a complete range of mechanical pressure gauges for professional use, manufactured in Pontarlier.

Devices designed by Schrader:
UNIVAIR - MASTAIR - MAESTRO.

Devices manufactured under licence from Michelin:
EURODAINU - EURODAIRA -
EURODAJAO.

**INFLATING GAUGE
INSTRUCTIONS**

To effectively use your inflating gauge we suggest you:

- periodically purge the compressed air ductwork system
 - put a filter on the air inlet (see page 87)
 - connect the gauge to a hose reel
 - avoid inflating hydro-flated tyres with air and, more importantly, releasing the handle while in use
 - regulary check for leakage around the air inlet and outlet connections
 - not overtighten the "Drake" coupler on the air inlet
 - not lock the handle while in use.
- Anti-puncture products contained in the tyres are corrosive and may prevent gauges from functioning properly.
- our appliances may be used for nitrogen inflation applications.

All inflaters adhere to
EC regulations.

MAST' AIR[®]
UNIV' AIR[®] MAESTRO
EURODAINU

SAFETY REQUIREMENTS:

Length of outlet hose:

L = 1,50 m

L = 3 m

L = 6 m

Standard appliance delivered with a hose L = 1,50 m.
